Hi Jacob Putulik,

The integrity of a bug report is measured by the tester's ability to provide useful and actionable information, in an efficient way. Below is a list of bugs you reported last week which received a Report Integrity indicator:

Positive Report Integrity

- [\(5227603\)](#) CA - Account - "Shop New Arrivals" link leads to missing page
- [\(5227659\)](#) CA - Account - "Find Your Store" link redirects to homepage of [coach.com](#)
- [\(5227664\)](#) CA - Gallery - "Signature Denim Jacket" PDP link leads to main
- [\(5227688\)](#) CA - PLP - All filters (categories) returns no results
- [\(5227789\)](#) Canada - Responsibility - Nothing happens after click on " Our Processes and Partners" link
- [\(5227800\)](#) Canada - Responsibility - "Customization" link leads to missing page
- [\(5227830\)](#) Canada - Store Locator - 404 error on "Store Locator" page
- [\(5227929\)](#) Canada - Find Your Outlet Store - Unable to find store via postal code

Note: You are only seeing reports that received a positive or substandard report integrity indicator. Reports that received no indicator are not reflected.

Please note: The integrity of a bug report is measured by the tester's ability to provide useful and actionable information, in an efficient way.

Report Integrity will impact your rating. As such, uTest will reward testers who meet a high report integrity standard and also seek to educate testers who may be missing the mark. The art of creating a well-written bug report requires a balanced combination of testing and communication skills. Review this course for more information about [How to Write a Bug Report](#).
